PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of experience designing and delivering scalable, high-performance web applications across e-commerce, fintech, legal services, and enterprise platforms. Proficient in React.js, Next.js, Node.js, NestJS, and AWS, with a strong track record of improving performance metrics, reducing technical debt, and shipping clean, maintainable code. Adept at building responsive UIs, architecting secure REST APIs, and collaborating effectively in Agile environments. Passionate about leveraging modern technologies to create impactful digital products.

KEY SKILLS

Frontend: React.js, Next.js, Redux Toolkit, Zustand, React Query, Tailwind CSS, Material UI, Ant Design, Flowbite

Backend: Node.js, Express.js, NestJS (TypeScript), RabbitMQ, GoLang, Python, Django, Flask

Databases: PostgreSQL, MongoDB, Firebase Realtime DB, MySQL and Cloud DB's

DevOps & Cloud: AWS (EC2, S3, SQS, Athena, CDK, Serverless), PM2, Pulumi

Tools & Platforms: GitHub, Gitlab, Postman, Azure MSAL, Figma

PROFESSIONAL EXPERIENCE

Productbox · Full Stack Software Engineer *Mar 2025 – Present*

- Built and maintained responsive, interactive web interfaces using React.js with reusable component architecture, accelerating feature delivery and ensuring UI consistency across the application.
- Integrated front-end with backend services via RESTful APIs, ensuring seamless data flow, reliable state synchronization, and optimal application performance.
- Resolved critical performance bottlenecks using lazy loading, code splitting, and memoization improving load times and delivering a significantly smoother user experience.

Success.AI · Full Stack Developer *Sep 2024 – Present* · Remote (US)

- Engineered and maintained high-impact front-end features for an AI-powered sales automation platform serving thousands of users, using React.js, Next.js, and Tailwind CSS.
- Optimized data-fetching and caching strategies with React Query, reducing redundant API calls and improving dashboard responsiveness across key user workflows.
- Developed and integrated RESTful APIs with Node.js and NestJS, collaborating with cross-functional teams to ship robust, production-ready features on schedule.
- Contributed to scalable component libraries and design systems, reducing development time and ensuring consistent UX across the platform.

Meissasoft · Full Stack Developer *Jan 2024 – Mar 2025*

- Developed and maintained responsive, high-performance web applications using React.js and Next.js, delivering polished user experiences across multiple client projects.
- Designed and implemented secure, high-performance RESTful API endpoints, ensuring reliability and scalability under production load.
- Reduced application load time by 40% through optimized rendering logic, component-level performance tuning, and targeted use of server-side rendering with Next.js.

Softtik Technologies · Full Stack Developer *May 2023 – Jan 2024 · Remote*

- Built full-stack web applications using the MERN stack, delivering end-to-end features from database design to polished UI.
- Developed and optimized RESTful APIs for secure, scalable backend systems, improving data handling efficiency and system reliability.

KEY PROJECTS

Success.AI: AI-Powered Sales Automation Platform

- Built modular, performance-optimized front-end architecture with React.js, Next.js, and Tailwind CSS, supporting a high-traffic SaaS platform with complex UI workflows.
- Integrated AI-driven features into the front end, working closely with backend engineers to deliver seamless user experiences for lead generation, email automation, and analytics dashboards.
- Implemented efficient API consumption and caching using React Query, reducing redundant network requests by ~40% and improving data freshness across user sessions.
- Contributed to reusable component libraries and consistent theming, cutting UI development time and maintaining design coherence across all platform features.

CitizenPath: Legal Immigration Services Platform

- Refactored UI into reusable, testable components, reducing code duplication by ~30% and cutting legacy logic resulting in ~50% fewer UI bugs and improved code hygiene.
- Centralized theming and styling via a shared style module, enabling global design updates and ensuring visual consistency across the entire application.
- Modularized front-end architecture with feature-based structuring; applied profiling and memoization to reduce average file size by ~40% and unnecessary renders by ~25%, boosting performance and simplifying developer onboarding.

Moola: Fintech Application

- Built a modular, scalable front end using React.js, Tailwind CSS, Ant Design, Axios, and React Query cutting custom CSS overhead by 50% and reducing redundant API calls by 40%.
- Designed and optimized RESTful APIs with NestJS and AWS, improving backend response times by 30% through efficient query design and Firebase performance monitoring.
- Deployed backend infrastructure on AWS EC2 and S3 with PM2 process management, achieving 24/7 uptime, secure media storage, and reduced latency for end users.

Diligentsia: Corporate Due Diligence Platform

- Built scalable front-end architecture with React.js, React Query, and Ant Design, accelerating UI development by ~40% through modular components and consistent theming.
- Implemented API integration and intelligent caching with React Query, reducing redundant network requests by ~45% via normalized responses and structured cache keys.
- Developed robust backend services with NestJS, PostgreSQL, and TypeORM, enabling seamless CRUD operations with DTO validation, guards, and repository patterns.
- Implemented secure role-based access control using JWT, Passport.js strategies, and NestJS guards securing 100% of protected routes across all user roles.

MZB Engineering: Enterprise Dashboard

- Kickstarted the project from scratch, architecting a scalable front end with React.js, React Query, Axios, and Zustand — enabling clean state management and a modular, maintainable codebase.
- Designed and built reusable UI components and layout systems, accelerating feature development by ~50% through custom CSS utilities and consistent design patterns.
- Optimized data flow with React Query and Axios via caching, optimistic updates, and smart refetching; implemented global state with Zustand, simplifying logic across complex dashboards.

Zambeel: E-Commerce Platform

- Delivered a modern, fully responsive e-commerce platform using React.js, Next.js, and Tailwind CSS, providing an intuitive and performant shopping experience across devices.

- Built and optimized RESTful APIs with Node.js, Express.js, and MongoDB/PostgreSQL, supporting secure product management, order processing, and payment workflows.
- Implemented JWT-based authentication and role-based access control; deployed the full stack on AWS ensuring high availability, security, and 24/7 uptime.

EDUCATION

University of Engineering and Technology, Mardan

Bachelor of Science — Computer Software Engineering · Oct 2020 – Apr 2024
